How Shapeys Are Reshaping Math Learning

For years, children have loved learning alongside ABCmouse, and now they'll love learning math with My Math Academy's Shapeys. Students stay engaged while learning essential math concepts and skills as they work through games with the Shapeys at their own pace.

Improve Focus And Concentration

Adaptable, interactive game-based design and lively Shapey characters keep students engaged in learning.

Increase Math Confidence

Dynamic scaffolding is embedded within the games as students need assistance. This just-in-time support helps students master concepts through additional learning activities.

Make Math More Fun And Relatable

Truly fun gameplay is challenging without being overwhelming, and the game is true of good interactive! My Math Academy's Personalized Mastery Learning System™ ensures every child reaches and stays in their "just right" zone for optimal fun and learning.

Feature Real-World Scenarios

Realistic game activities situate math in meaningful scenarios so children can see how it can be used in everyday life.

Math Learning You Can Oversee As Easy As 1, 2, 3

My Math Academy's patented, real-time dashboards let teachers and administrators monitor progress at the school, classroom and student level. Teachers can quickly and easily track which concepts students have mastered and identify areas for extra help.

Built using an iterative, design thinking approach, My Math Academy features:

- Detailed, real-time teacher tools
- Meaningful game-based lessons
- Coursework that meets state and national standards
- Best-in-class instructional techniques
- Real-time performance data
- Progression tracks by knowledge level (not grade level)

Testimonials

"I love the content, love the mathematics, it is an age appropriate, I love the little Shapeys, and I love what they're doing. Students love they're playing a game. They're really happy and they want to go on it. I love that it is adaptive to their own pace, only My Math Academy makes the game."

Pre-K teacher

"The teacher dashboard is an amazing tool for our educators when it comes to planning their math instruction. With the guidance of the teacher dashboard, teachers can truly individualize instruction when they adjust our students' coursework."

Instructional Coach

"My principal was really impressed with the results at the end of the year, but more recently, many of the children shared a lot of games. I didn't change how I taught my lessons, but they started using My Math Academy and felt more excited about math."

Kindergarten teacher

"This tool that the program's been giving the students for you automatically saves the teacher time of time because students are already being placed where they need to be instead of having to go and figure out where they go...it saves me a lot of work and time."

First grade teacher

"My Math Academy explains things before students start playing a game. Even when a student could not help, they would come and ask me how to do it. They know they needed to keep playing because the game would help them figure it out -- I thought that was really good."

First grade teacher
